

PLANET OF LOVE

Indonesia | 85 minutes | Post-Production
Children, HIV, Education

[Trailer](#)

A grandmother and an orphanage caregiver strive to provide a happy childhood for a group of children with HIV/AIDS who have been cast aside from their school and are living in a cemetery complex.

Project Background

According to UNICEF in 2022, more than 2,5 million children and adolescents aged 0-19 are living with HIV. As of 2022, roughly 13.9 million [10.6-18.4 million] children under the age of 18 in Latin American, Asian and African Countries had lost one or both parents to AIDS-related causes. (Unicef, 2023) They experience discrimination and encounter obstacles in accessing their fundamental rights from an early age.

In Indonesia, children with HIV/AIDS (CWHIV) experience discrimination and encounter obstacles in accessing their fundamental rights despite government regulations at both the national and regional levels. Stigma of the disease continues to impede the fulfilment of these basic rights.

The caregivers at Lentera Orphanage are aware that, as CWHIV, these children are vulnerable to being ostracised. They have devised scenarios to ensure that Lentera's children do not have to disclose details about their lives in the orphanage. However, when their HIV status is revealed, parents of other children pressure them to leave the school. Through the determination of the Lentera staff, Puger (49), along with the support of Ngatiyem (65), the grandmother of one of the children with HIV, the children at Lentera are growing, playing, and learning with the time they have.

Through the impact distribution of PLANET OF LOVE, we seek to encourage more consistent and sustainable implementation of CWHIV-friendly school regulations.

Impact Goal

We want to **build a network of CWHIV-friendly schools in Indonesia** through:

Network of Love

Together with Yayasan Lentera Surakarta, we aim to establish this network in the five cities with the highest number of CWHIV cases in Indonesia. The objective is to ensure that parent committees

optimally implement the mandate of creating CWHIV-friendly schools. Furthermore we are optimistic that this network can also expand globally to countries with a high population of children and adolescents living with HIV.

Impact Distribution Strategy

Within two years, we will establish the Network of Love in schools across five target cities. Specifically, we will target three types of audiences:

1. School Committees & Parents of Students

- Understanding the issue of CWHIV from three perspectives: humanist, religious, and medical.
- Committing to protecting the rights of CWHIV in their schools.

2. Public & Media

- Supporting CWHIV campaigns after the screenings.

3. Government

- Issuing a reference letter to Indonesian schools to adhere to the principles of inclusive schools.

Collaboration Wish

1. Bridging **Relations with the International Media to influence the Government of Indonesia** and other countries with news coverage about education rights for children with HIV.
2. Bridging relations with **INGO specialising in HIV and Children** related issues.
3. Connecting the team with **Experts and Organisations** to enable global solidarity and continuous learning exchange.
4. Giving consultations, designing methodologies, and Conducting **Monitoring & Evaluation**.
5. Providing **Funding** for post-production and impact distribution.
6. Creating and managing the **Website & Social Media**.

Budget

Program Implementation	USD 19,820
Film Completion	USD 20,110
Distribution	USD 32,000
Human Resources	USD 35,872
Total Budget	USD 107,802
